u18270574	18	13	13	44	Good job! You should not have created 'reserved' empty cards on your homepage. Instead, those should
					have been added when you load the movies. To understand why, consider the case where you might have to
					display >=1000 movies on your homepage. It is not practical or a good exercise to manually copy-and-paste
					>=100 'reserved' empty cards on your homepage. In addition to this, you should have not hardcoded the
					references to each card's button. The idea is that you're supposed to automatically generate all the cards
					and assign their corresponding button to an onClickListener that can resolve the id of the card/movie that
					was clicked. If you are unsure how to add objects to local Storage, please see
					https://www.w3schools.com/js/js_json_stringify.asp
u18279547	20	8	13	41	Well done. Looks good. You could use jQuery to increase and decrease values. It is similar to adding and
					removing table rows, but instead of rows it is simple number as attached to the buttons.

Username	20	15	13	48	NOTES:
u21473669	20	7	13	40	Well done. I do not mind that the cart is on the wrong screen. You push the data to local storage and then in
					the cart window it pulls the data. If you have it on one page you use a local array. It is not a bad approach, it
					is just a different approach. Good attempt. I am certain you will get it right with a little more exercise.
u21475009	20	13	13	46	Please explain your code in more detail. You can't just show it. We need to see that you understand and can
					explain what you did. Otherwise good attempt, it's mainly your decrease function not working so please
					work through the HW2 memo and book a consultation in the future if you struggle with anything.
u21475653	20	5	13	38	Good work. Please look at the HW2 memo to see an easier way of displaying the cards and dividing the
					functions up. Also work through the code for the cart page. This will help you in the future when working
					with MVC.
u21478377	14	6	13	33	Good attempt. Look at \$( document ).ready() that you could use to run code on the program's startup. Work
					though the HW2 memo and note how there are functions such as displayCards and displayCart that we run
					on certain button clicks which will update the data displayed. A larger program will become very slow and
					inefficient if you are updating it with new data every time the mouse moves. Please book a consultation if
					you want to discuss the program. We'll be able to provide all the help you need there.
u21478831				0	
u21481084	14	14	13		The way you made use of local Storage is not according to what we specified. Good job getting it to work in
u21401004	1	14	13	71	a way, but please work through the memo to see a better way to store the data that you want to persist and
					make sure to read through the specification and rubric carefully for the next homework assignment. Overall
					good attempt!
u21481360				0	good attempt:

Username	20	15	13		NOTES:
u21493198	15	0	11	26	There are duplicate bootstrap links in your html. You should not have been creating multiple
					AddItemsInCartX methods. Instead, its better to create one such method and pass it the id of movie you
					want add. You should have stored the movie and not just the title. its possible to have diff. movies that have
					the same title. If you are unsure how to add objects to local Storage, please see
					https://www.w3schools.com/js/js_json_stringify.asp
u21493546	8	0	11	19	
					are here to help you.
u21496073	0	0	0	0	I assume that you started with this assignment too late to be able to complete it in time. Additionally you
					did not make a demo available of any type. If you refer to the assignment specifications, then you will
					receive a zero. Both the demo as well as the complete assignment needs to be uploaded. If you continue in
					this way you will end up having exam refusal. Please do not leave assignments to the last moment as this
					will come back to make your life very difficult. Additionally, the marks from the quizzes as well as the post-
					activity practical work will not be enough to get exam entrance. You will have to do very well in Semester
					Tests to get into the exam just to get the opportunity to write exam, and then the exam itself will not
					necessarily be easy. Please start working on the module otherwise you will come to regret it later.

Username	20	15	13	48	NOTES:
u21526096	16	2	10	28	Please work through the HW2 memo. It will benefit you greatly to have a good understanding of how this works. Look at how the program is divided up into different functions and how there is a common pattern between them and make sure you understand how the Bootstrap grid system works. Please book a consultation and attend the practical sessions if you struggle in the future. Also please use relative paths and not full paths to files and folders in your code as it breaks the program when I need to run it on my side.
u21528498	13	6	13	32	cards not dynamically created, increase and decrease on cart not working
u21529401				0	u21429792. Code Very Similar. Almost Identical. Small differences noted. Why did you do this?
u21529664	13	9	13	35	Good attempt! Please work through the HW2 memo to ensure you understand how to code the cart page and how to work with local Storage to retrieve and set the data. Note how the functions all basically have the same pattern.
u21529818	20	15	13	48	Well done!
u21534421	0	0	0	0	Remember to start early on assignment in order to get it done before the deadline. You can then also consult and get help on topics which you did not fully grasp You can do this, but it will require work
u21537144	6	0	7	13	Well done on displaying the cards dynamically. Please have a look at the suggested solution on how to do the home and cart functionality.
u21539627	20	15	13	48	Well done!
u21543845				0	
u21544931	13	m	13	29	Please ensure you understand how to make use of the Bootstrap grid system. Please work through the HW2 memo and note the use of local Storage and how the cards are displayed dynamically using the array of objects. You basically didn't need any CSS for this assignment. Well done on making use of the local Storage on the home page. Unfortunate that you cart page does not work. Please book a consultation in the future so that we can help you if you struggle.
u21555347	16	15	13	44	Modal not working
u21557277	1	0	13	14	Well done for the styling! Please consult with the suggested solutions. It is important to understand how to do the following JavaScript and jQuery. If you require help, please attend the practical sessions or consultations.
u21559512	18	11	13	42	Well done! Your only problem was making the data in the cart besides the movie booking persistent. So please work through the memo to see how the data is retrieved and updated from local Storage. Very good work otherwise.
u21562246	7	5	11	23	You have demonstrated that you know how to use local Storage for storing one item, however, you did not use it to store other required information. When working with files, it is not a good idea to use full paths since that means your code will only work on your computer. Instead, you should use relative paths. In line 7 of index.html, you're referencing style.css but you did not create such a file. There are a number of elements without matching tags in your html file. It may help to click 'View Source' when your page is rendered and that may point out all your html errors.
u21562832	20	15	13	48	Well done!
u21563048				0	
u21566641	20	15	13	48	Excellent work!
u21568872	0	0	0	0	Source code not submitted, and the demo not done correctly. The demo video setup cannot be accessed. Keep in mind that both the source code and the demo should be submitted. Please refer to assignment instructions. If one of the other is missing, then you will receive a zero. We require both.
u21570427	14	14	13	41	Well done!

u21583588				0	
u21587427				0	
u21589276	18	15	13	46	Excellent work, keep it up
u21598267	20	15	12	47	Thank you for using a GitHub submission. You can set a container in the divs to prevent resizing, but other
					than that, it is really very good. Well done.
u21600393				0	
u21605310	6	0	12	18	Please use meaningful names for your html files. You should not have created 'reserved' empty cards in
					U21605310_HW02.html. Instead, those should have been added when you load the movies. To understand
					why, consider the case where you might have to display >=1000 movies on your homepage. It is not
					practical or a good exercise to manually copy-and-paste >=100 'reserved' empty cards on your homepage.
					Your modal only works for one card (i.e., birdbox).
u21609170	20	0	13	33	Well done for the styling and home functionality. Have a look at the cart functionality in the suggested
					solution.
u21612472	16	0	13	29	Home functionality and styling were done well.
u21612812	0	0	0	0	Where is your source code? If you refer to the assignment specifications, then you will receive a zero. Both
					the demo as well as the complete assignment needs to be uploaded. You could have obtained some marks
					for the assignment with the demo submitted as required. There is no such thing as "lose 50% of the marks"
					if the demo or the code is missing. It is requirements and specifications. If one or the other is missing, then
					you get a zero. Please leave enough time in terms of the completion of the assignment to complete both the
					assignment as well as the demo. There will unfortunately be no deviation and variation with regards to the
					requirements.
u21617598	11	0	10	21
